

MP Series Mini-Panels

Efficient - designed specifically for smaller facilities and municipalities

Affordable - reduces capital expenditures of new systems and equipment

Scalable - increasing number of system circuits enables growth

Keltron's MP Series mini-panels provide reliable coded fire alarm circuit control and supervision for smaller municipalities and facilities that require only a few fire alarm circuits. Mini-panels offer an affordable and reliable means of increasing the number of system circuits without the investment in a new mainframe assembly.

Mini-panels are stand-alone units that interface within twenty-four volt (24V) power supply. Each mini-panel incorporates the solid-state design features of our larger SSP-4 fire alarm panel. The units provide the operator with maximum efficiency, while minimizing complexity.

MP Series features

Keltron offer four types of mini-panels: type A, type B, alarm, and monitor. Each includes multiple features including:

- Compact size and modular design
- Solid-state design
- High resolution, wide angle, switchable digital meter
- Lightweight, sturdy aluminum enclosures suitable for rack or console mounting
- Fault and trouble audio alarms are distinctively different
- Visual indicators are clearly labeled and color coded
- Self-contained circuit timers for low current and auto-ground
- Circuit indicators for open circuit, low current, auto-ground, and repeater off
- Full supervision of box and alarm circuits
- High efficiency DC-to-DC converters, four switch selectable output voltages
- Automatically conditions circuits to receive signals through ground return
- Built-in test
- Easy installation

MP Series specifications

Input power	24 VDC +/- 4.0 volts, 0.7 amperes
Size	19" w X 3.5" h X 1.2" d
Color	White Federal Standard #27875
Temperature range	32 degrees F to 120 degrees F

Keltron develops and manufactures secure, reliable, UL-listed fire and security alarm response management systems and components for the municipal and proprietary life safety markets. Products include radio fire alarm, coded fire alarm and high-line security systems, digital alarm receivers, universally compatible fire alarm control panel networking solutions and a full line of alarm annunciators.
