

Keltron TA Series Modular LED Annunciators

Enables instant event identification

Provides low-cost option

Resists tampering and wear

Keltron's TA Series modular LED annunciators enable immediate identification of all alarm, trouble or off-normal fire, security or environmental conditions. TA Series UL-listed annunciators are easily installed, highly reliable and can be easily modified as conditions and/or locations change. Keltron offers seven standard models in three sizes, as well as custom units, to provide a cost effective alternative to standard silk-screened or press-on letter type annunciators.

TA Series features

- **UL-listed and CSFM listed**
- **10-25% lower cost** than custom annunciators
- **Mounts in a standard gang box**
- **Interoperates** with standard control panels
- **High-intensity LEDs** enable accurate zone identification. Available in two colors, red for alarm and yellow for trouble. The LEDs are rated for 100,000 hours of life.
- **Rugged anodized aluminum** faceplates, painted red. Moisture and corrosion resistant.
- **Opaque, masked, type-able plastic legend strips** may be easily modified. Inserts accommodate up to 20 typed characters or 20 eight-point transfer letters per zone. LED indicators are visible through legend only when lit. Legends are inserted behind plastic faceplate for additional protection from tampering, vandalism and the elements.
- **High impact plastic faceplates** and legend holders are durable, scratch-resistant and require no maintenance.
- **Ships completely assembled** and ready for easy installation
- **Standard units operate** from 2 volts, current limited or 5, 12 or 24 VDC

TA Series options

Exterior mounting, part no. WP-X, where X is gang size
LEDs in green, amber, orange, blue or clear
Stainless steel faceplate
Surface or flush mounted, refer to table

Availability and pricing

All standard Keltron TA Series modular LED annunciator models are available for immediate delivery. Custom TA Series annunciators require separate quotes.
