

Keltron PL Remote Plates

Enables instant event identification

Provides remote monitoring

Resists tampering and wear

Keltron PL remote plates provide immediate identification of alarm, trouble or off-normal conditions in fire security or general annunciation applications. It is a cost effective alternative to standard silk-screened or press on letter type plates, and is easily installed, durable and may be easily modified as conditions or locations change.

PL features

- ✔ **Dual (interior/exterior) panel configuration**
PL label sheet and indicators are located on the interior panel. The clear exterior panel protects label sheet, indicators and system components from vandalism and wear. The interior display is easily accessible for label sheet replacement.
- ✔ **High-intensity LED indicators** enable clear, long-life visual alarm identification. Rated at 100,000 hours life the indicators are available in red for alarm and yellow for trouble.
- ✔ **Standard face plate is red**
- ✔ **Panel-mounted terminal strips, I/O boards or terminal blocks** permit quick and accurate field interconnect wiring during installation.

PL options

Surface or semi flush mount
LED indicators available in several different colors
Interior/Exterior mounting
Two LEDs per zone
Stainless steel face plate
